PUBLICATION DATE: FEBRUARY 7, 2000

This is an annual report providing annual and comparative statistics from the five State Mental Retardation Centers (MRCs). Data included in the report are submitted by the MRC's to the Division Information Technology Section, Data Support Branch.

This report is presented in three parts. **Part I** is a summary and comparison of fiscal year 1999 to the four previous years. Also a persons served summary for the past ten fiscal years are presented. Significant statistics and trends are outlined in this section.

Part II is a group of four detailed summary tables. **Table 1** provides a comparison of Major service indicators for the past ten fiscal years. **Table II** provides detailed data for the current fiscal year for each of the five Mental Retardation Centers. **Table III** is a summary of service indicators presented in a regional format. **Table IV** is a summary of persons served by region and area.

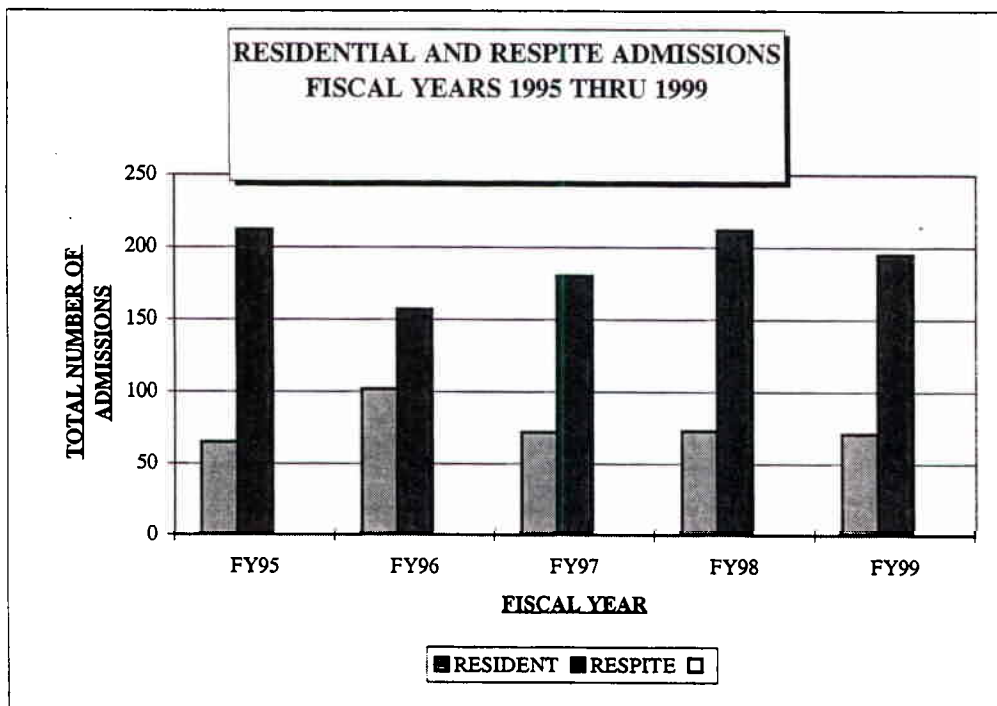

Part III presents statistics pertaining to clients in residence or on leave from the five North Carolina Mental Retardation Centers on June 30, 1999. Respite care clients are not included.

PART I – SUMMARY AND COMPARATIVE HIGHLIGHTS

ADMISSIONS*

There were 266 admissions to North Carolina Mental Retardation Centers during fiscal year 1999. of these admissions, 73 percent (195) were respite care and 27 percent (71) were regular admissions.

Total admissions in FY 1999 were 7 percent lower than the FY1998 level. Respite admissions, increased from 212 in fiscal year 1998 to 195 in fiscal year 1999.

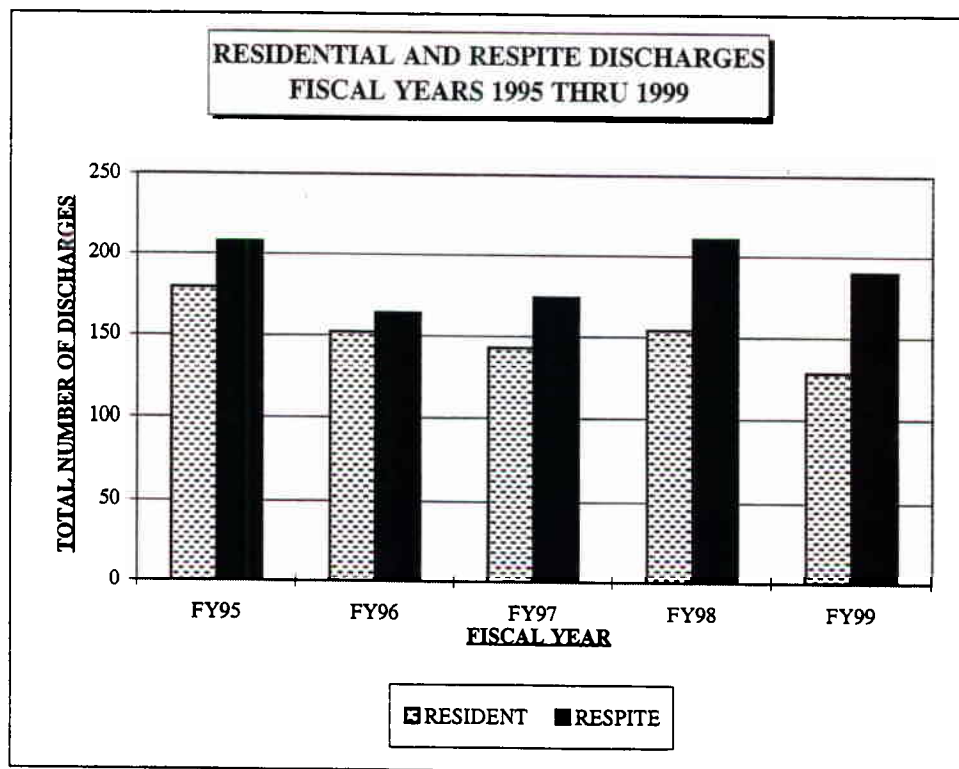

*Admissions include transfers-in.

DISCHARGES

During the fiscal year 1999 there were a total of 318 discharges including deaths and transfers out from the five North Carolina Mental Retardation Centers. When compared with FY1995, FY1999 has changed to a 18% increase. Respite care discharges accounted for 59% percent (190) of all discharges in FY1999, while direct and indirect residential discharges transfer out and deaths (128) comprised the remaining 40 percent of discharges.

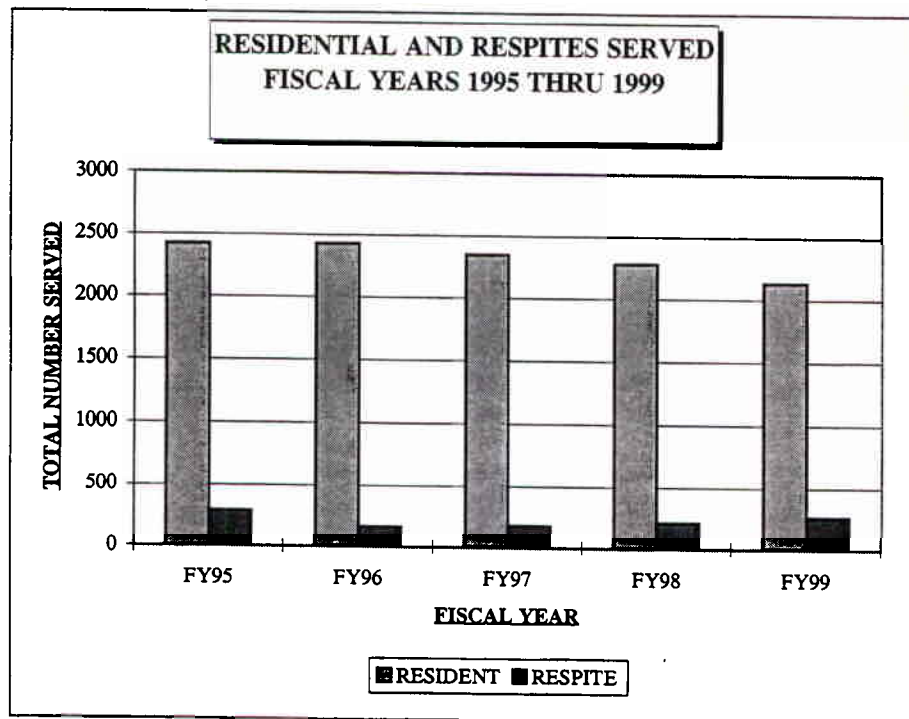

The graph below depicts the number of resident and respite discharges. It is interesting to note the increase in the ratio of respite to resident discharges over the last five years.

PERSONS SERVED

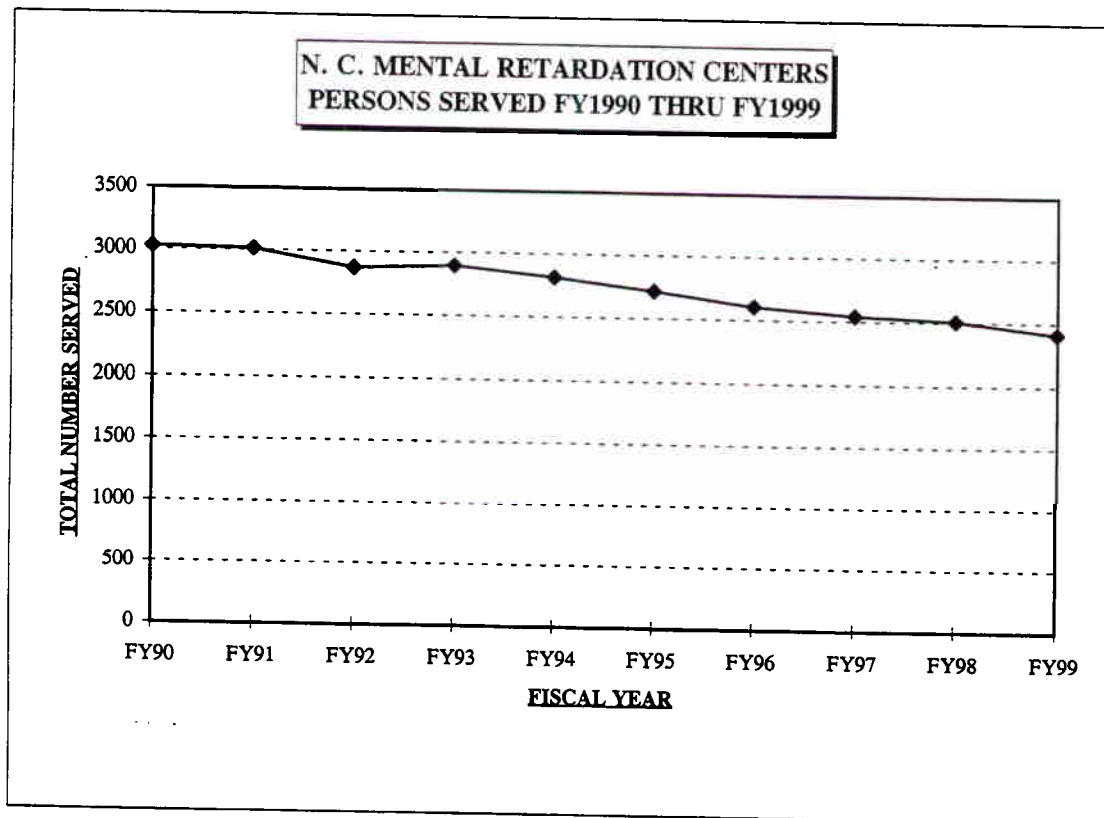

The number of persons served at the North Carolina Mental Retardation Centers for fiscal year 1999 was 2,409. This total, 2,136 residents (2,034 resident and 102 Alzheimer's unit at Black Mountain Center) and 273 respite care clients is a decrease of 3.9 percent from the 1998 total of 2,508. There was a slight decrease in the residential but an increase in the respites served in FY99. The number of respite care clients served showed an increase from 224 in fiscal year 1998 to 273 in fiscal year 1999, while residential clients served decreased from 2,284 in fiscal year 1998 to 2,136 in fiscal year 1999.

The data presented in the graph below represent the number of persons served at the Mental Retardation Centers for fiscal year 1995 to 1999 divided into residential and Respite care groups. As may be noted from the graph, total persons served by the MRC's has declined slightly each year. While the year decline is slight, the accumulated decline since 1995 is 11 percent.

PERSONS SERVED

The data presented in the graph below represents the total number of persons served at the Mental Retardation Centers for fiscal years 1990 to 1999. As may be noted from the graph below, persons served continues a downward trend.

PART III – DETAILED SUMMARY TABLES

PROFILE SUMMARY

Part III is presented in graph and tabular format to profile selected characteristics of the population of each center and the aggregate population of all five centers. The graphs present resident population trends for the previous fifteen years. The tables provide frequency distributions by race, sex and age groups, plus length of stay and other developmental disabilities.

GRAPHS:

The graphs on pages 14 through 19 show population trends over the past ten years. On June 30, 1999 the resident and on-leave population at the five Mental Retardation Centers totaled 2,080. This represents a 20% decline from the end of fiscal year 1990 when the resident on-leave population was 2,603 persons.

Over the past ten years the resident population at each of the mental retardation centers has declined. Although Western Carolina Center experienced periods of growth during the late 1970's and early 1980's they, like all the MRC's, have had a general decline in numbers of residents since peaking in 1971. The sharp drop in the population at Western Carolina Center between 1982 and 1983 reflects transfer of residents to Black Mountain Center. The increase in the population in Black Mountain reflects the Alzheimer Unit, which started during fiscal year 1992-93.

TABLES:

Six tables contain statistics for each of the five Mental Retardation Centers and a statewide summary. The data in all tables reflect statistics for Age Groups, Race/Sex, and Length of Stay.

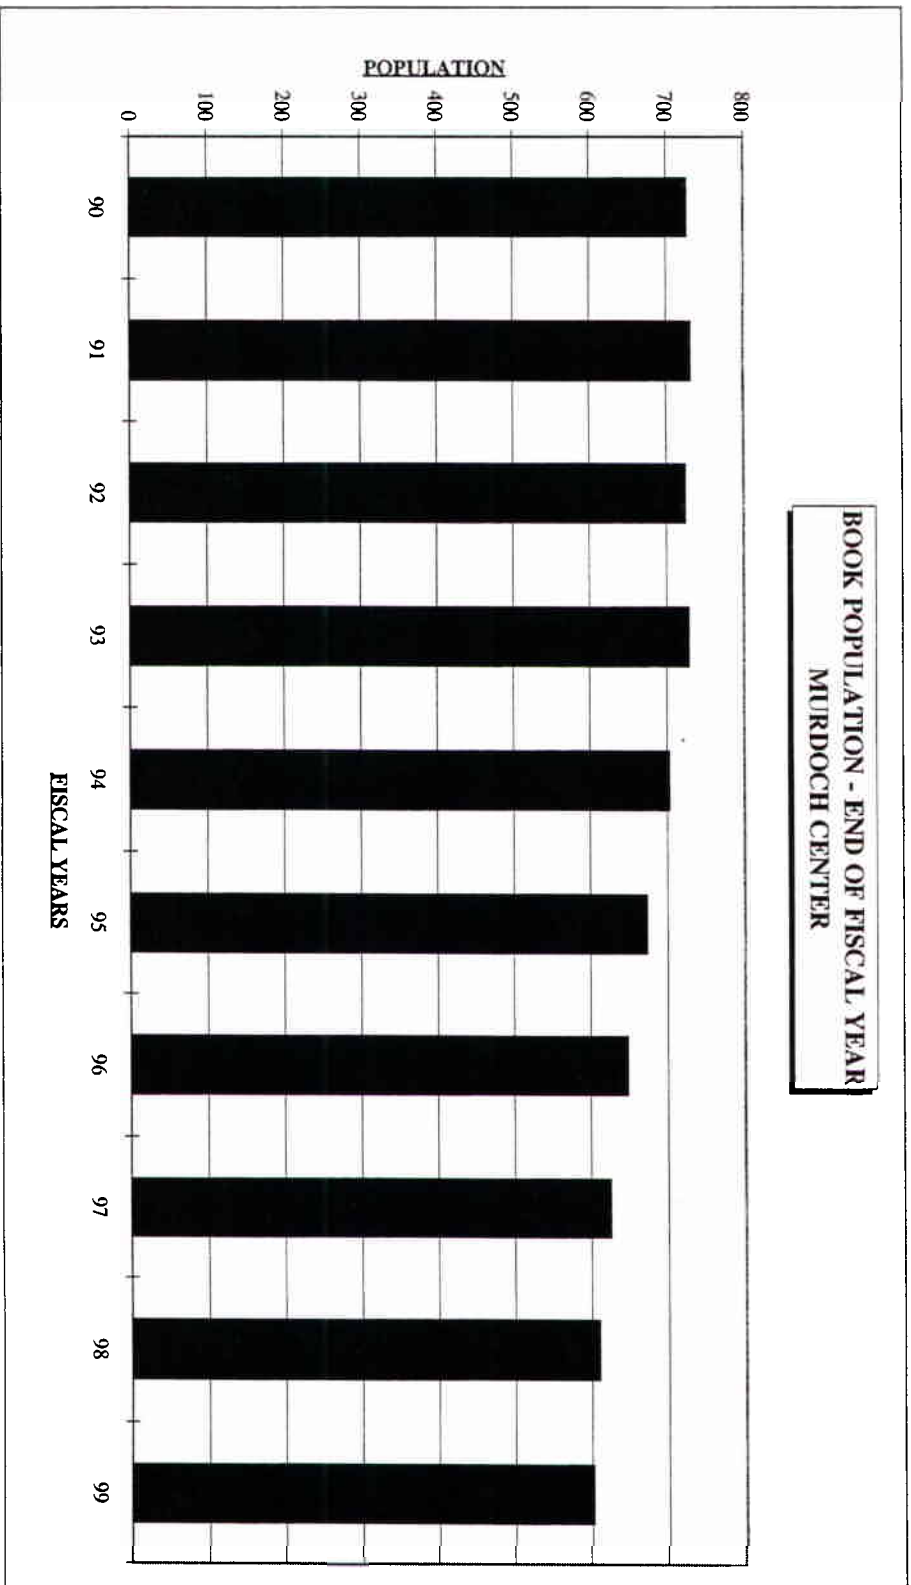

Some of the key points from the tables are:

Forty-eight percent of the residents are currently between the ages of 25 and 44.

Eighty-nine percent of the residents are severely or profoundly retarded.

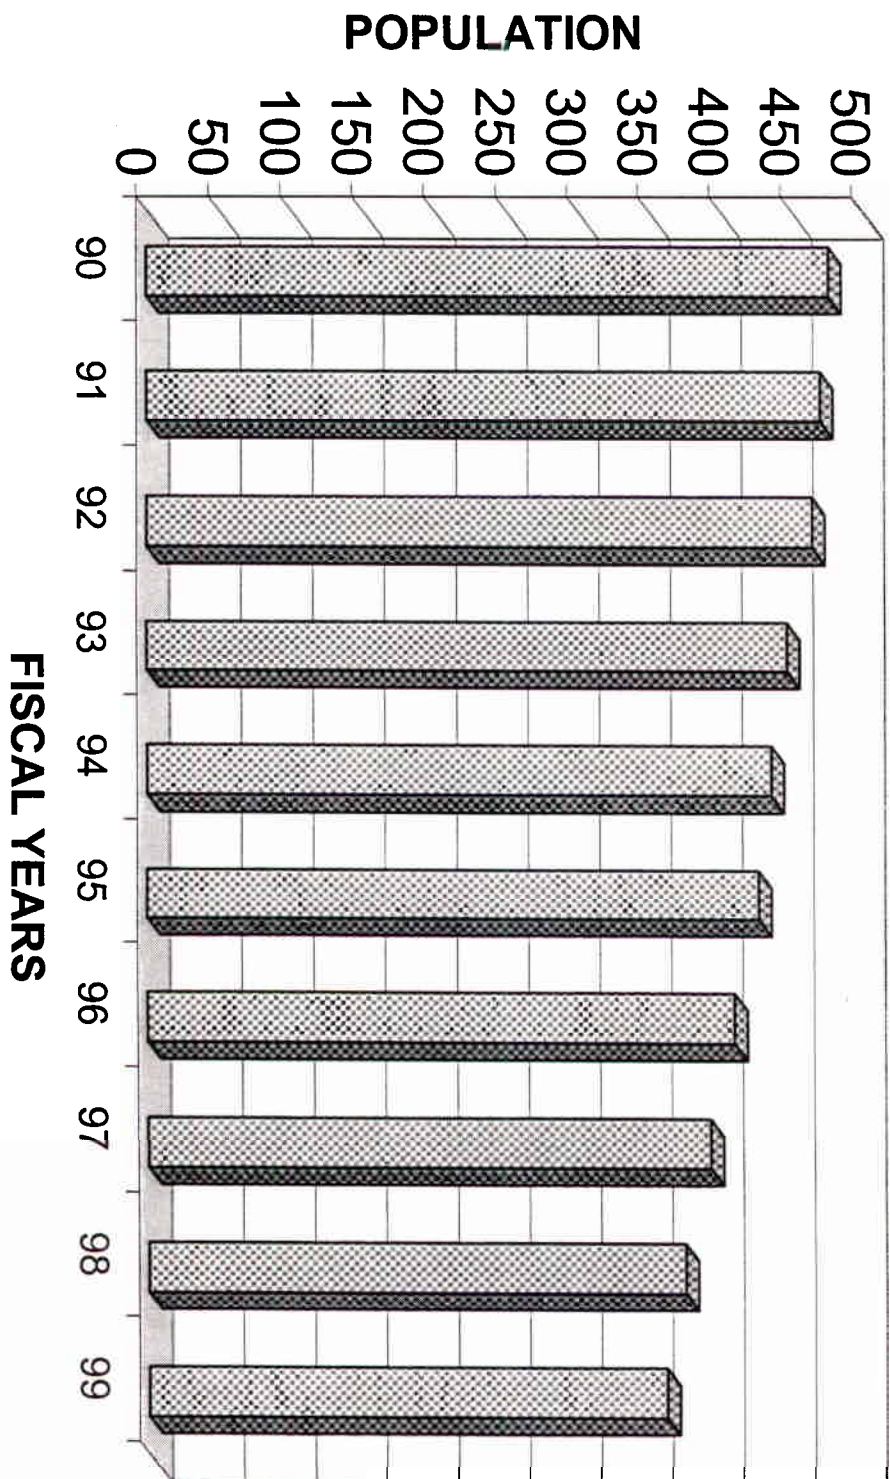

Fifty-one percent of the residents have a length of stay of over 30 years.

Fifty-eight percent of the residents were males and forty-two percent of the residents were females.

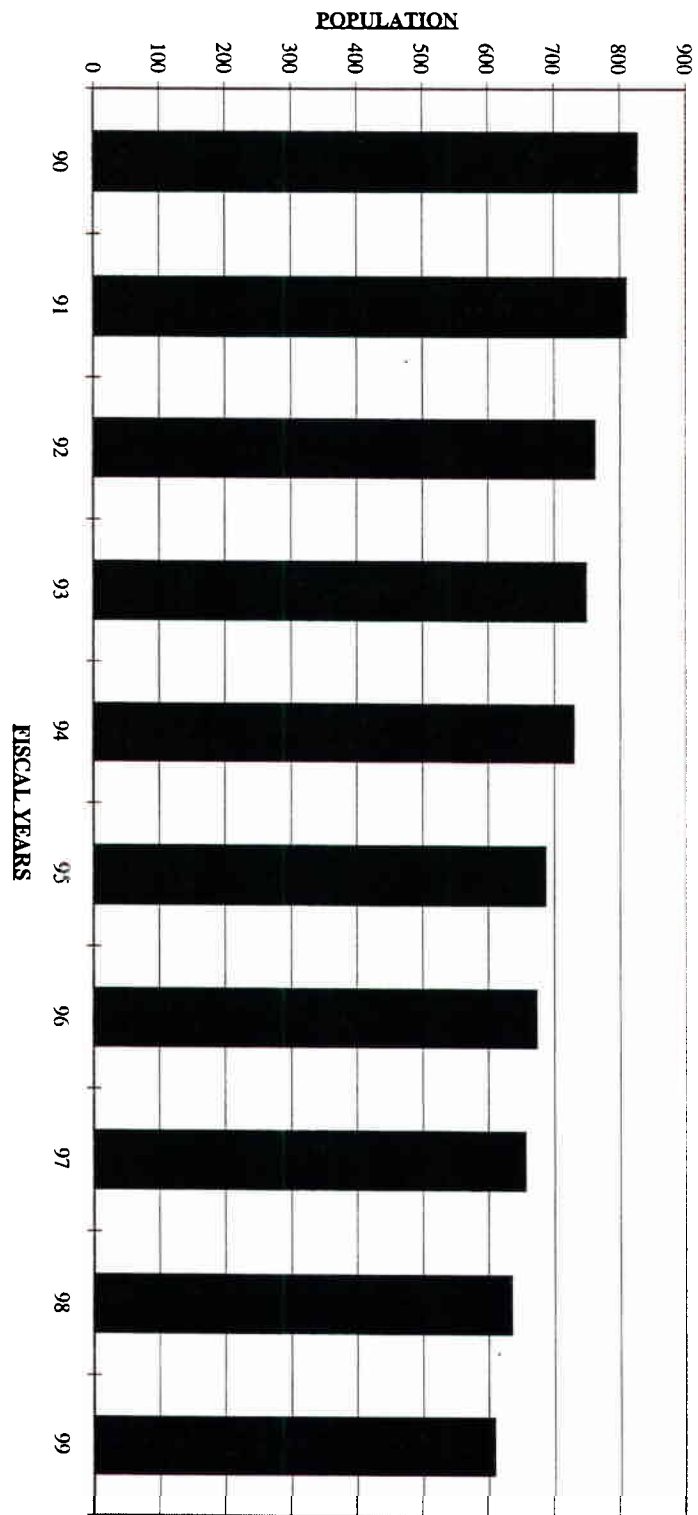

Book Population includes Resident, On Leaves and Respite Care Clients.

BOOK POPULATION- END OF FISCAL YEAR O'BERRY CENTER
